Profile

Passionate Software Engineer and Full Stack Developer specializing in the JavaScript ecosystem (Node.js, Express, React). With a strong background in Object-Oriented Programming and Clean Architecture, I build scalable web applications and efficient RESTful APIs. Adept at database management (SQL & NoSQL) and eager to leverage my problem-solving skills to deliver high-performance solutions.

Professional Experience

Full Stack Developer, *Sef Academy* 06/2025 – Present
Cairo, Egypt

- Designed and developed scalable web applications, implementing Clean Architecture principles to ensure code maintainability.
- Built and optimized RESTful APIs, handling data exchange between the server and client-side efficiently.
- Managed database schemas and complex queries using SQL Server, ensuring data integrity and performance.
- Collaborated with the frontend team to integrate user-facing elements with server-side logic.
- Implemented authentication and authorization features to secure application access.

Full Stack Developer, *Intcore* 03/2025 – 09/2025
Remote ,cairo ,Egypt

- Developed scalable web applications and dashboards using Node.js, Express, and React.js to meet client requirements.
- Designed and optimized RESTful APIs, ensuring secure data exchange and high performance for client-side consumption.
- Managed database schemas using MongoDB and PostgreSQL, implementing complex queries and data relationships.
- Applied clean code principles and MVC architecture to maintain a scalable codebase.
- Integrated third-party services (Payment Gateways, Email Services) to enhance system functionality.

Frontend Developer, *Innova* 01/2024 – 02/2025
Mansoura, Egypt

- Built responsive and interactive user interfaces using React.js and Bootstrap, ensuring cross-browser compatibility.
- Collaborated closely with backend developers to integrate REST APIs and handle dynamic data rendering.
- Translated UI/UX designs (Figma/Adobe XD) into pixel-perfect, reusable code components.
- Optimized application performance and loading times, enhancing the overall user experience.
- Utilized Git for version control and collaborated with the team in an Agile environment.

Education

Bachelor of Software Engineering, 09/2019 – 07/2023
Faculty of Computer & Information Sciences Mansoura University

Skills

Languages
JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend
React.js, Next.js, Bootstrap, Tailwind CSS, Redux

Backend & Services
Node.js, Express.js, RESTful APIs, JWT (Authentication), MVC Architecture

Databases
MongoDB (Mongoose), PostgreSQL, SQL Server

Tools
Git, GitHub, Postman, VS Code

Projects

Anti-Phobia – Virtual Reality Therapy System, *Graduation Project* 01/2023 – 06/2023

- Developed a VR-based therapy system for treating phobias using Unity for patients and Flutter for doctors.
- Implemented Firebase Authentication, Realtime Database, and Cloud Storage to track patient progress.
- Built chat functionality for direct doctor–patient communication and diagnosis.

shopEase- Multi-Vendor E-Commerce Platform
Tech Stack: Node.js, Express, MongoDB (Mongoose), Redis, Stripe API, JWT.

- Built a RESTful API for a multi-vendor platform using Node.js & Express, following MVC design patterns.
- Implemented secure Authentication & Authorization (RBAC) for Admins, Sellers, and Customers using JWT.
- Integrated Stripe Payment Gateway to handle secure transactions and checkout sessions.
- Optimized database performance by implementing Redis Caching for frequently accessed products.
- Designed MongoDB schemas with relationships for Order Management, Inventory Tracking, and Reviews.

TaskFlow - Real-Time Collaboration System
Tech Stack: Node.js, Socket.io, React.js, PostgreSQL (Sequelize), AWS S3.

- Developed a real-time project management tool enabling teams to create boards, lists, and tasks instantly.
- Leveraged Socket.io to implement bi-directional communication for real-time updates on task movements.
- Built a robust file upload system using AWS S3 for attaching documents and images to tasks.
- Implemented complex SQL queries using Sequelize ORM to handle relationships between Users, Boards, and Tasks.
- Ensured code quality by writing Unit Tests using Jest and following CI/CD practices.

BiteCraft - Restaurant Landing & Menu Interface
Tech Stack: JavaScript (ES6+), HTML5, CSS3 (Flexbox/Grid), Responsive Design (Bootstrap).

- Developed a modern, fully responsive restaurant interface providing a seamless user experience.
- Implemented Dynamic DOM Manipulation using vanilla JavaScript to render menu items efficiently.
- Designed an interactive UI with smooth scrolling and optimized image loading for High Performance.
- Ensured cross-browser compatibility and adhered to Web Accessibility standards.

Languages

Arabic
Native/Bilingual

English
Proficient

Awards

Front-End Development Libraries, *FreeCodeCamp* 01/09/2025
Covers React.js, Bootstrap and jQuery with hands-on projects to apply these technologies.

Responsive Web Design, *FreeCodeCamp* 01/04/2025
Covers the fundamentals of HTML, CSS, Flexbox, and CSS Grid, along with practical projects to build responsive web pages.

The Complete Full-Stack Web Development Bootcamp, *Udemy* 01/03/2025
Full-Stack Web Developer with just ONE course. HTML, CSS, Javascript, Node, React, PostgreSQL, Web3 and DApps
